EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or reasonably suggest a combination of performing a first level of speech recognition at a local device, and performing a second level of speech recognition at a processing facility, wherein the local device has a first speech generating engine operable to generate speech output, and wherein the remote network has a second speech generation engine operable to generate speech output. Specifically, the prior art does not disclose or reasonably suggest a first speech generation engine at a local device and a second speech generation engine at a remote network, prior to Applicants' priority date of 12 April 1999. Generally, it is known to perform speech recognition at both a client and at a server in a client/server architecture, but it is not widely known to perform speech synthesis both at a client and at a server. Applicants' Specification, Figures 2 and 3, shows a local device 14 having a speech generation engine 42 and a remote system 12 having a speech generation engine 72. Applicants' Specification, Page 19, Lines 12 to 17, discloses an advantage that in the event a speech output capability of a local device is not adequate to address the needs of the user, a resident voice user interface (VUI) can be supplemented by the more extensive capability provided by the remote system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
